APPARATUS BODY OPTIONS

Rosenbauer's FX, CT and EXT apparatus bodies can all be paired with a Smart Cab configuration. Ask about custom tool mounting options.

INNOVATIVE MOUNTING SYSTEM

Smart Cabs are mounted using an innovative, specially designed metacone rubber mounting system to reduce road shock, vibration and noise.

SMART CAB™

EXCLUSIVELY BY ROSENBAUER

INTRODUCING THE SMART CAB™

Smart for your budget. Smart for firefighters. Smart for operations.

EASY ACCESS TO THE EQUIPMENT YOU NEED

Dedicated mountings for equipment such as flashlights, gloves, radios, thermal cameras, AED and gas meters provide easy access during emergencies.

STATE-OF-THE-ART TECHNOLOGY

Rosenbauer's EZGress™ swing-out step provides excellent entry and egress with only 14 inches from ground to first step. Its reliable mechanical design does not use air or electricity to operate.

DESIGNED FOR ULTIMATE COMFORT

There's nothing like Rosenbauer's all-new Smart Cab. The Smart Cab has standard forward-facing crew seats with optional seating for up to eight. With 70 inches of headroom and 100 inches wide, the Smart Cab has ample room for the crew while en route and for rehab operations. Standard or recessed SCBA style seats are available, both with NFPA compliant seat belts.

HVAC & LED LIGHTS

Heating and air conditioning are standard. Recessed red and white LED lights provide good lighting both en route and on scene.

THE QUIETEST ON THE MARKET

Special insulation and sound absorbing material reduces the noise level to 75 decibels at 65 mph, well below NFPA recommended levels.

THE LATEST INNOVATIONS, BUILT TO MEET YOUR NEEDS

Custom-built console provides instant accessibility to all warning system controls and radios for both driver and office. Large opening between cabs provides good communication and visibility for all crew.
