The NEXT GENERATION HIGH REACH ELEVATED TURRET

- Single multi-function joystick for boom, pierce and nozzle control.
- Rosenbauer's EXCLUSIVE position and shoot system (PASS) provides 90 degrees up or down rotation of the penetrating tip.
- Flared penetrating tip to cleanly pierce composite material used on newer aircraft.
- Able to provide positive off angle penetrations up to 30°
- No mechanical clutches or hose reel to malfunction during operation.
- Dry chemical and Halotron options available at tip.
- Single source after sales service and support for entire vehicle.
- Exceeds AC 5220-10E and NFPA 414

Able to reach the top deck of the Boeing 747 and Airbus 380.
